

Organizadores: Ecos Sud/ IDAES/ Colegio Doctoral

Titulo del seminario: DIGITAL METHODS FOR SOCIAL SCIENCES

Docente: Étienne Ollion Investigador CNRS (Universidad de Strasbourg-Francia)

Fechas: 14 al 18 de marzo

Horario: 17 a 20 horas

Lugar: IDAES, Sede Paraná

Objetivo general:

The goal of this course is to offer an introduction to the theories and practice of digital methods in the social sciences. The approach will be hands-on, in order to enable the participants to carry out their own project by teaching the central tools of data analysis. This detour through the techniques of data science will in turn shed new lights on the controversies that have surrounded the development of these methods in our disciplines. It will also offer forays into the algorithms that increasingly govern our everyday life.

Estructura y contenidos del curso:

-Current debates about digital methods for social sciences and a panorama of the tools available for conducting digital research.

-Web functions, and techniques to crawl and parse a webpage.

-How to select data?

-Automation and storage

-How to select and clean up data?

Destinatarios: gratuito para estudiantes de posgrado y docentes de la UNSAM hasta cubrir vacantes

Consultas e Inscripciones: dgaidaes@unsam.edu.ar

Nota: El seminario se dictará en inglés. Los alumnos deben asistir a clase con sus computadoras personales. No es necesario contar con conocimientos previos en informática.
